JHOUVANN MORDEN

jvanmorden@gmail.com | github.com/Joooban | linkedin.com/in/jhouvann-morden-9a7544294/https://jvanmorden.is-a.dev/

Computer Science student with experience leading technical projects, coordinating cross-functional teams, and applying technology to solve business problems. Skilled in project coordination, stakeholder communication, AI workflow automation, and cloud technologies. Seeking to contribute analytical thinking and organizational skills in technology-driven environments.

Technical Skills

- **Programming**: Python, Java, C++, C#, JavaScript, TypeScript, SQL, Dart
- **Frameworks & Technologies**: Node.js, Express.js, React, Next.js, FastAPI, Vite, Flutter, Riverpod
- **Databases & ORM:** SQL, SQLite (sqflite), PostgreSQL, Supabase, Prisma ORM, Drizzle ORM
- **Automation, AI & CRM:** Claude, Claude Code, Claude API, n8n, GoHighLevel, CRM Management
- **Cloud & Developer Tools**: AWS Cloud Foundations, Git, GitHub, Netlify, Render, Vercel, Vitest, Playwright
- **Business & Productivity**: Microsoft Office 365 (Excel, Word, PowerPoint), Google Workspace, WordPress
- **Creative Tools:** Canva, CapCut
- **Additional**: Video Editing, Audio/Video Transcription, Typing Speed: 90–120 WPM

Work Experience

EIZOU FILMS Davao City, Philippines

IT/ Business Development Associate Jun 2026 – Present

- Generated and qualified leads through outbound prospecting and market research.
- Managed CRM records and sales pipelines using GoHighLevel.
- Assisted in marketing strategy, content planning, and client communications.

Soft Skills

- Leadership · Project Coordination · Stakeholder Communication · Team Collaboration · Time Management · Problem Solving · Adaptability

Education

Bachelor of Science **Mapua Malayan Colleges of Mindanao** Davao City, PH 08/2023 - Present

- Major in Computer Science

Senior High School **University of the Immaculate Conception** Davao City, PH 08/2021 - 04/2023

- Science, Technology, Engineering, and Mathematics (STEM)

Projects

Tasa — Coffee-Life Tracker for the Philippines September 2026

- Flutter (Dart)· Riverpod · sqflite
  - Built and shipped an installable Android app for logging home/café coffee, with PH-specific pricing, a forgiving "Rain Check" streak system, and a shareable Wrapped-style monthly summary.

Atlas Waste & Removals — Client Website August 2026

- WordPress · Squarespace Domains · HTML, CSS, JS
  - Built and launched a site for a UK-based client (atlaswasteandremovals.co.uk) and connected the custom domain via Squarespace.

EIZOU Creatives — Production Tracker July - August 2026

- React 19 · TypeScript · Node.js/Express · PostgreSQL · Prisma ORM · Netlify · Render
  - Built a full-stack tool for a content agency managing client deliverables through a 7-stage pipeline, with per-client quotas, editor output tracking, and multi-platform publish tracking.

AskWhiz — Institutional Knowledge Chatbot (Undergraduate Thesis) May 2025 – Jun 2026

- FastAPI · Amazon OpenSearch · Claude API · FAISS · RAGAS · Render
  - Built and deployed a RAG chatbot for MMCM.

MMCMate+ & Margatron — Institutional AI Chatbots Oct 2024 – Jan 2026

- Python · Google Gemini API · Streamlit · Node.js · SQLite
  - Developed two AI chatbots for admissions and student services with multilingual support and an admin knowledge base.

Kitchen Sentinel — Smart Stove & Gas Leak Alert System May 2025 – Jul 2025

- ESP32 · Arduino · MQ-2 · PIR · IoT
  - Developed an IoT kitchen safety monitoring system that detected gas leaks, fire hazards, and unattended cooking.

Regional Economic Forecasting Application Jan 2025 – Apr 2025

- Python · Prophet · Scikit-learn · Pandas
  - Built a regional household income forecasting application. Applied Prophet and regression models to government datasets.

Smart Inventory System Aug 2024 – Nov 2024

- Node.js · JavaScript · SQL
  - Developed a web-based inventory management system. Implemented stock tracking and inventory reporting.

Draftcast - League of Legends Win Predictor October - November 2026

- Python · scikit-learn · LightGBM · pandas · FastAPI · React 19 · TypeScript · Vite · SQLite · Riot Games API · Render
  - Built and deployed an ML web app that predicts ranked match outcomes from the champion draft or the scoreboard at 10:00/15:00, and explains each prediction factor by factor.
  - Collected 25,000+ ranked matches from the Riot Games API with a rate-limited, resumable pipeline. Trained on older patches and tested on the newest one, with out-of-fold features so a game's own result never leaked into its inputs.
  - Found that the draft alone is close to a coin flip (AUC 0.53), while game state at 15:00 reaches AUC 0.82 (74% accuracy). Benchmarked LightGBM, which didn't beat logistic regression, so the interpretable model runs the app.

Lead Finder - Lead Generation & Outreach CRM October 2026

- Next.js 16 · TypeScript · PostgreSQL (Supabase) · Drizzle ORM · Vercel
  - Built and deployed a full-stack lead generation tool for EIZOU FILMS. It pulls local businesses from OpenStreetMap, crawls their websites for verified emails and social links, and scores each lead 0–100 with explained reasons.
  - Built a drag-and-drop sales pipeline with follow-up reminders, email templates with merge fields, a lead map, analytics, and weekly automated re-runs, all on free-tier infrastructure.
  - Secured data with Postgres row-level security and an SSRF-safe crawler; covered with 331 automated tests (Vitest, Playwright).

Certifications

- AWS Academy Graduate - Cloud Foundations
- AWS Academy Graduate - Cloud Operations
- IT Specialist - Data Analytics
- Microsoft Office Specialist: Excel Associate (Office 2019)
- AWS Certified AI Practitioner

Leadership & Involvements

Internal Vice President — Coding Organization for Digital Excellence (CODE MMCM) 2023–2024

Internal Vice President — Computing Students Society (CSS MMCM) 2024–2025

Auditor — Philippine Society of Information Technology Students - Davao Region (PSITS) 2024–2025

Commissioner — (MMCM COMELEC) 2025–Present
